

```

>>invokedMethods
  ^(self containedEntities flatCollect: [:each| each invokedMethods]) asSet.
>>referencedClasses
  ^(self invokedMethods collect: [:m| m belongsTo]) asSet.
>>referencedPackages
  ^(self referencedClasses collect: [:c| c packagedIn]) asSet.
>>referencedNamespaces
  ^(self referencedClasses collect: [:c| c belongsTo]) asSet.
....etc.

```

an example for their implementation

navigationMethods

should be re-implemented: using Method>>outgoingInvocations
